DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification, as originally filed, does not provide adequate written description for the electrophoretic manipulator of instant claims 3-5. Figure 1 shows the manipulator but there is no detailed description in the specification of the components that comprise the manipulator. Since the manipulator is the essential element for carrying out the method of claim 1, the specification also does not provide adequate written description for the method of claim 1. If the specifics of the manipulator are not adequately disclosed then the method of claim 1 cannot be performed.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 is vague and indefinite. In line 2, the recitation of "adapted to" is not clear as to how the applicator has been modified to apply the electrical pulse.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patents 5,783,455 and 6,289,286 disclose methods of regenerating surfaces with antigen-antibody complexes by using various reagents that disrupt the antigen-antibody complexes.
